

THE HOLY ART

MEMORIES TO COLOURS BRAZIL

Saturday, September 4, 2021 to Saturday, September 11, 2021

My art is to convey my essence.

Through colours and my affective memories I connect with my inner self and with the sensations that helped form my life. Brazilian culture, the joy and diversity of its people are the essential fuels that shape my work, and in each creative process this connection is composed in different ways, taking me to new places.

And it is through this stimulus that I translate into my work everything I feel, the places from the past I miss as well as the sensations and energy that motivate me to move forward. Technically, I create new colours and tones in all my works, in order to precisely translate the authenticity of where I was born. By mixing the originally intended palette, I come to accept the infinity of colours, and in the end the results not only surprise my audience but also surprise me.
