

THE HOLY ART

VISUAL POETRY

Tuesday, June 1, 2021 to Tuesday, June 15, 2021

Nature is Fantastic.

"The starting point for my photography is not f-stops, shutter speeds or exposure. These are purely left-brain, camera variables. When I look at a subject, I study it like a painter and decide what I want to create. My imagination takes over and I see what the object before me might look like.

I see the object with my imagination. I call this right-brain photography."
